The FLAG, the Field-tested Learning Assessment Guide, is an online guidebook filled with proven, innovative assessment techniques specifically designed for courses in science, mathematics, engineering, and technology (SMET). Visit the FLAG to find:

- **Classroom Assessment Techniques (CATs)** – methods to guide and assess student learning.
- **Searchable Assessment Tools** that can be downloaded and integrated into SMET courses.
- **A Primer on Assessment** that explains the strategies and benefits of using alternative assessment in SMET courses.
- **Resources in Assessment** – a list of assessment experts nationwide, links to related Web sites, an annotated bibliography, and featured articles from respected scientific and teaching journals.
