College Level One Team

WHO WE ARE

The NISE College Level One Team, based at the University of Wisconsin-Madison and funded by the National Science Foundation, is a nationwide community of post-secondary science, mathematics, engineering, and technology (SMET) faculty, education researchers, faculty developers, and fellows.

OUR MISSION

- To improve SMET students’ learning experiences and critical thinking skills
- To engage and retain a growing and diverse student population in SMET disciplines
- To improve science and mathematics literacy for all college students

Introductory college science and mathematics courses serve as curriculum “pressure points” that can strongly influence students’ career choices and science literacy. The NISE College Level One Team fosters supportive college SMET learning environments in which all students participate, learn what scientists and engineers do, and develop a lifelong appreciation for science and mathematics.
