VISIT the LT^2 Website to find:

**Case studies**  In-depth studies of learning technology innovations at a variety of post-secondary institutions, featuring courses in diverse science, mathematics, engineering, and technology disciplines. Personal narratives of faculty and students, from on-site interviews, cover virtually every logistical, technological, interpersonal, and political issue involved in adapting learning technologies into courses or curricula.

**Short stories**  Lively first-person accounts of the learning technology experiences of faculty from around the country. Site visitors can contact each faculty via e-mail to ask questions and sample the technology via Web links.

**Frequently asked questions**  A quick stop for opinions, advice, and bits of wisdom from experienced learning technology users.

**Evaluation**  Evaluation resources to help faculty assess the role of learning technologies in improving student learning.

**Learning technology taxonomy**  A comprehensive taxonomy of learning with technologies, based on a thorough analysis of literature on technology and learning.
